Application/Control Number: 10/637,154

Art Unit: 2837

1. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970);and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

2. Claims 1-26 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-16 of U.S. Patent No. 6,540,045. Although the conflicting claims are not identical, they are not patentably distinct from each other because the method steps of the instant application are the same as claimed in the patent except stated in different wording and also made broader. For example, comparing claim 1 of the instant application and claim 1 of the patent, the differences are the following:

A phrase "with at least one venting passage extending essentially substantially over the length of said ear plug device between regions respectively facing the ear drum and the outer environment" is inserted into claim 1 of the instant application. This phrase described an ear device as stated in claim 1 of the patent "individualized for individuals".

Application/Control Number: 10/637,154

Art Unit: 2837

Another phrase "shape of said venting passage" in claim 1 of the instant application replaces "shape of each individual's area of application for a hearing device" in claim 1 of the patent.

Further, "parts" in claim 1 of the instant application replaces "individual shell" in claim 1 of the patent.

The above modification of languages does not make the method in the instant application a different method of making an ear device from the claim of the patent.

Regarding the rest of the claims, the claimed method steps of the instant application are the same as the method steps of the patent.

- 3. Claims 1-26 would be allowable if a terminal disclaimer is timely submitted.
- 4. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Shih-yung Hsieh whose telephone number is 571-272-2065. The examiner can normally be reached on 8-4:30.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, David Martin can be reached on 571-272-2107. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
